

TOHOPEKALIGA HS TECHNICAL THEATRE

Design & Production:

The course is an exploration of the duties of stage technicians and their contribution to the total aesthetic effect of a dramatic production. Students focus on developing the basic skills and procedures for creating elements of technical theatre, including costumes, lighting, makeup, scenery, and sound. Technical knowledge of safety procedures and demonstrated safe operation of theatre equipment, tools, and raw materials are central to success in this course.

Scenery and Props:

This course focuses the students' creativity on the painting and decorating of scenery--both realistic and not--and on creating the stage props for all Theatre Department productions. A variety of media, material, and techniques will be studied and used, including Papier-mâché, cardboard, thermoplastic forming, plaster of Paris molding, and screen printing.
