

Narcoossee Middle School

Electives Selection Worksheet 2025-2026

CORE ACADEMIC COURSES: *Core academic courses are automatically assigned to students based on most recent test scores.* All 6th grade students will be placed in the following core academic courses:

- ❖ Language Arts 1, Adv.
- ❖ Intensive Reading 1 **OR** Research 1
- ❖ World History, Adv.
- ❖ 6th Grade Math **OR** 6th Grade Math Accelerated
- ❖ Comprehensive Science 1

ELECTIVE COURSES: In addition to the core academic courses, students will be enrolled in two (2) elective courses. All elective course offerings are tentative. Course availability is subject to change at administrative discretion. **Although every effort will be made to accommodate students' requests, selecting a course does not guarantee placement.**

All students will be enrolled in at least one semester of Physical Education (required elective). Please choose one of the following options for PE. Rank your preference (priority) from 1-3

Elective	Priority (1-2)
PE and Art (1 semester of each)	
PE Full Year	

All students will be enrolled in one additional full-year elective. Choose three options below and rank your preference from 1-3.

Elective	Priority (1-3)
AVID	
Band 1	
Chorus 1	
Orchestra 1	
STEM Project Lead The Way	
STEM Orientation to Career Clusters

Narcoossee Middle School

Electives Selection Worksheet 2025-2026

NCMS Potential 6th Grade Elective Options

Art - Students are introduced to the art production process including: planning, producing, and reflecting on art. Students explore a wide range of 2D and 3D media, skills and techniques as related to contemporary and historical art perspectives.

AVID - By application only. Advancement Via Individual Determination (AVID) is an academic elective course that prepares students for college readiness and success, and it is scheduled during the regular school day as a year-long course. Each week, students receive instruction that utilizes a rigorous college-preparatory curriculum provided by AVID Center, tutor-facilitated study groups, motivational activities, and academic success skills. In AVID, students participate in activities that incorporate strategies focused on writing, inquiry, collaboration, organization, and reading to support their academic growth. Additionally, students engage in activities centered around exploring college and career opportunities and their own agency.

Band - Students with little or no instrumental experience develop foundational instrumental technique, foundational music literacy, and aesthetic musical awareness through rehearsal, performance, and study of high-quality band literature. Instrumentalists work on the fundamentals of music notation, sound production, instrument care and maintenance, and personal and group rehearsal strategies. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

Chorus - Students with little or no choral experience develop beginning vocal technique and skills, critical and creative thinking skills, and an appreciation of music from around the world and through time. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom.

Orchestra - Students who have little or no experience on violin, viola, cello, bass, or harp explore high-quality music literature written or transcribed for string orchestra. Study includes the development of foundational instrumental ensemble techniques, performance skills, music literacy, and aesthetic awareness. Public performances may serve as a culmination of specific instructional goals. Students may be required to attend and/or participate in rehearsals and performances outside the school day to support, extend, and assess learning in the classroom. This course may also require students to obtain a musical instrument (e.g., borrow, rent, purchase) from an outside source.

Physical Education - The purpose of this course is to provide a foundation of knowledge and skills necessary for the development of a physically active lifestyle. The course addresses both the health and skill-based components of physical fitness, by providing a variety of movement opportunities which include but are not limited to fitness activities and team sports.

STEM Orientation to Career Clusters - Have you ever thought about what's inside objects we use? Students learn about how technology progressed from cavemen discovering fire and making simple tools, to the development of smart phones and computers. We will breakdown what things are made of to design and build new and improved objects using the design process and our own minds!

STEM Project Lead The Way - Have you ever wanted to create a toy or a device to help people? Students use tools such as the design process, a dynamic mathematics software, a computer-aided design program, computer simulations, an engineering notebook, and 3D printers to design, model, and build objects. Discover the design process and turn your ideas into realities!
