

Attention Digital Learning Parents and Students!

Every student in kindergarten through tenth grade needs to take the NWEA Beginning of Year Math Baseline test. Math teachers have been guiding our digital learning students on the process this week.

If your child hasn't taken the test, please help them test as soon as possible. This test can be accessed at: <https://test.mapnwea.org/>

You will need a session name and session password that was provided by your child's teacher. Please contact them if you do not have it.

If you need technical help with the test, you can find support by either calling your child's school, or by calling our help line at: 407-870-4037. Lines open at 7:00 a.m. on Monday.
